2017 Summer School on Emergent Phenomena in Quantum Materials

May 31 – June 2, 2017

Explore the frontiers of quantum materials research:
• strongly correlated systems and topological phases
• synergy between analytical and computational approaches
• focus on problems motivated by experiments
• practical knowledge for immediate application

Speakers

Andrey Chubukov
University of Minnesota

Hong Yao
Tsinghua University

Michael Zaletel
Princeton University

Yong Baek Kim
University of Toronto

Ashvin Vishwanath
Harvard University

Lukasz Fidkowski
Stony Brook University

Simon Trebst
University of Cologne

Info & Registration
http://epqm.lassp.cornell.edu

Organizers
Eun-Ah Kim Cornell
Erich Mueller Cornell

Applications due by April 22nd
